Mobile Application Development
Assignment -1 and 2

2. WAP to demonstrate the following UI. Save date into SQLite database on Submit Button. Do all validation of the following form before saving to the database.

```
┌─────────────────────────────────────────┐
│   ┌─────────────────────────────────┐    │
│   │       Enter First Name          │    │
│   └─────────────────────────────────┘    │
│   ┌─────────────────────────────────┐    │
│   │       Enter Last Name           │    │
│   └─────────────────────────────────┘    │
│   ┌─────────────────────────────────┐    │
│   │     Enter Mobile Number         │    │
│   └─────────────────────────────────┘    │
│   ┌─────────────────────────────────┐    │
│   │      Enter your Email           │    │
│   └─────────────────────────────────┘    │
│         ┌──────────────────┐             │
│         │     SUBMIT        │            │
│         └──────────────────┘             │
└─────────────────────────────────────────┘
```

3. WAP to demonstrate web services. Consider following information:
   Get request: https://reqres.in/api/users?page=2
   Use any library to make a get request and parse response into data model class and show it on the UI as you want.
